DATA ANALYST TECHNICAL TEST

MAGANG MANDIRI SEAL BATCH 1 2026

PRESENTED BY
ANGGA YULIAN ADI PRADANA

MARKETING ADS PERFORMANCE QUERY

BigQuery query to monitor and evaluate daily campaign-level ads performance

	A	B	C	D	E	F	G	H	I	J	K	L	M
1	date	campaign_id	campaign_name	campaign_category	donation_amount	total_donation	total_donor	ads_spending	total_impression	total_pageview	total_new_user	conversion_rate_pct	pct_spending_per_donation_amoun
2	26/01/2020	19117	bantu ojan gerak kem	Sarana & Infrastruktur	50000	1	1	0	0	0	0	0	0
3	21/01/2020	115501	Gabung Bersama Ger	Bantuan Medis & Kesehatan	10000	1	1	0	0	0	2	0	0
4	16/01/2020	87067	#BisaSembuh Bersar	Bantuan Medis & Kesehatan	200000	1	1	0	0	0	0	0	0
5	15/01/2020	146467	medis rumah sakit	Bantuan Medis & Kesehatan	10000	1	1	0	0	0	0	0	0

Key Findings

48 rows (day × campaign) analyzed

Ads active only 3/48 days & inefficient (spend consistently > donation)

#BisaSembuh → highest total donation (Rp 934K)

Conversion tracked once (17%) → limited & not aligned data

CAMPAIGN FLAG & COMPLAINT TICKET QUERY

BigQuery query to analyze campaign flag, donation performance, and complaint behavior

	A	B	C	D	E	F	G
1	campaign_id	campaign_name	total_donation_amount	campaign_flag	is_complain	no_of_complain	percentage_of_high_priority_ticket

32	17804	Rumah Zakat	0	online_acquisition	NO	0	
33	170369	Bantu pengobatan bayi grace	0	online_acquisition	YES	2	500

Key Findings

- 66 campaigns analyzed
- 74% campaigners submitted complaints
- Online acquisition dominates campaign source
- Many campaigns have 0 donation → low effectiveness
- Top campaigns still submit complaints → platform friction

COMPANY HEALTH DASHBOARD

Interactive dashboard for management to monitor company health and performance

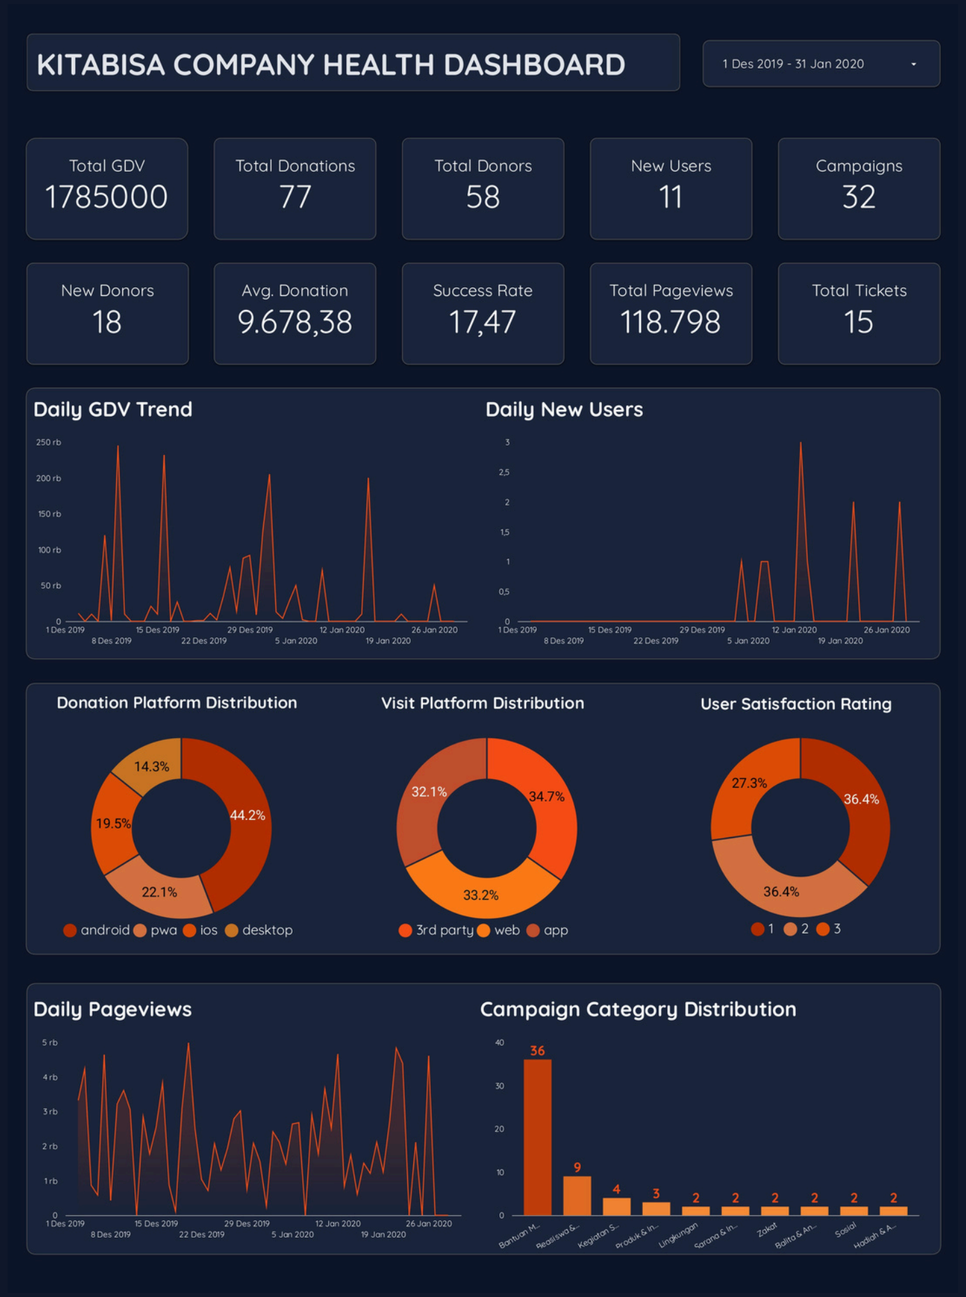
Key Metrics

- Total GDV: Rp 1.78M
- Total Donations: 77
- Total Donors: 58
- New Users: 11
- Campaigns Launched: 32
- New Donors: 18

Dashboard Features

- Default view: This Month
- Dynamic title based on selected period
- Export raw data to CSV
- 17 visualizations (scorecard, line, pie, bar)

Link to Dashboard: https://lookerstudio.google.com/reporting/c501ede7-a634-4622-a979-a901ec681528



DATA OVERVIEW & DATA QUALITY NOTES

Dataset Summary

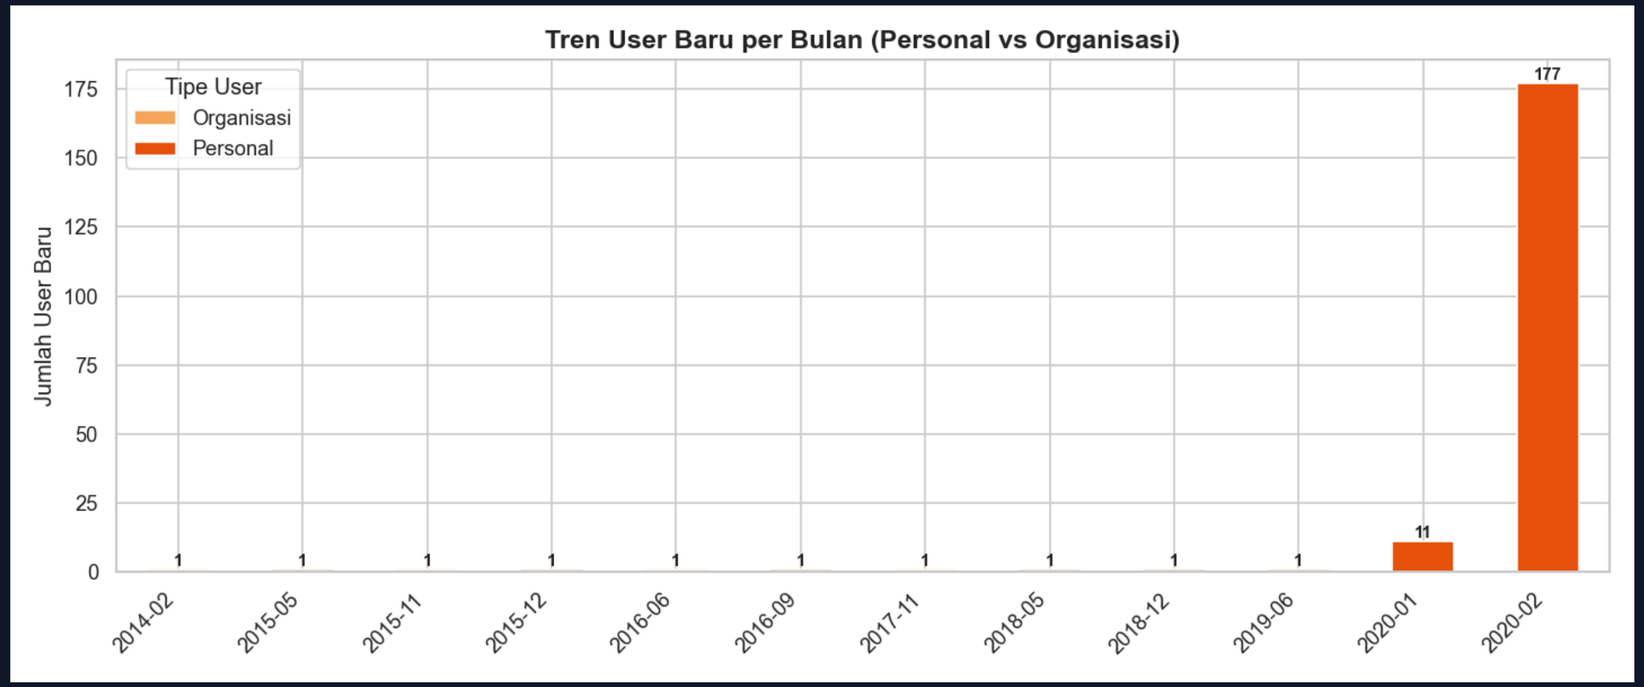
Table	Number of Rows	Period
donation	200	Dec 2019 - Feb 2020
user	198	2014 - Feb 2020
campaign	66	2013 - Jan 2020
ads_spent	205	Dec 2019 - Jan 2020
visit	222	Dec 2019 - Jan 2020
ticket	283	Feb 2020

Key Findings

- user.updated mostly NULL (93%) → excluded from analysis
- user.province inconsistent → mapped to correct provinces
- donation.platform inconsistent → standardized using LOWER()
- 17 users with invalid timeline (donation < registration) → excluded
- ads & visit data not aligned → many zero values (data limitation)

NEW USER GROWTH TRENDS

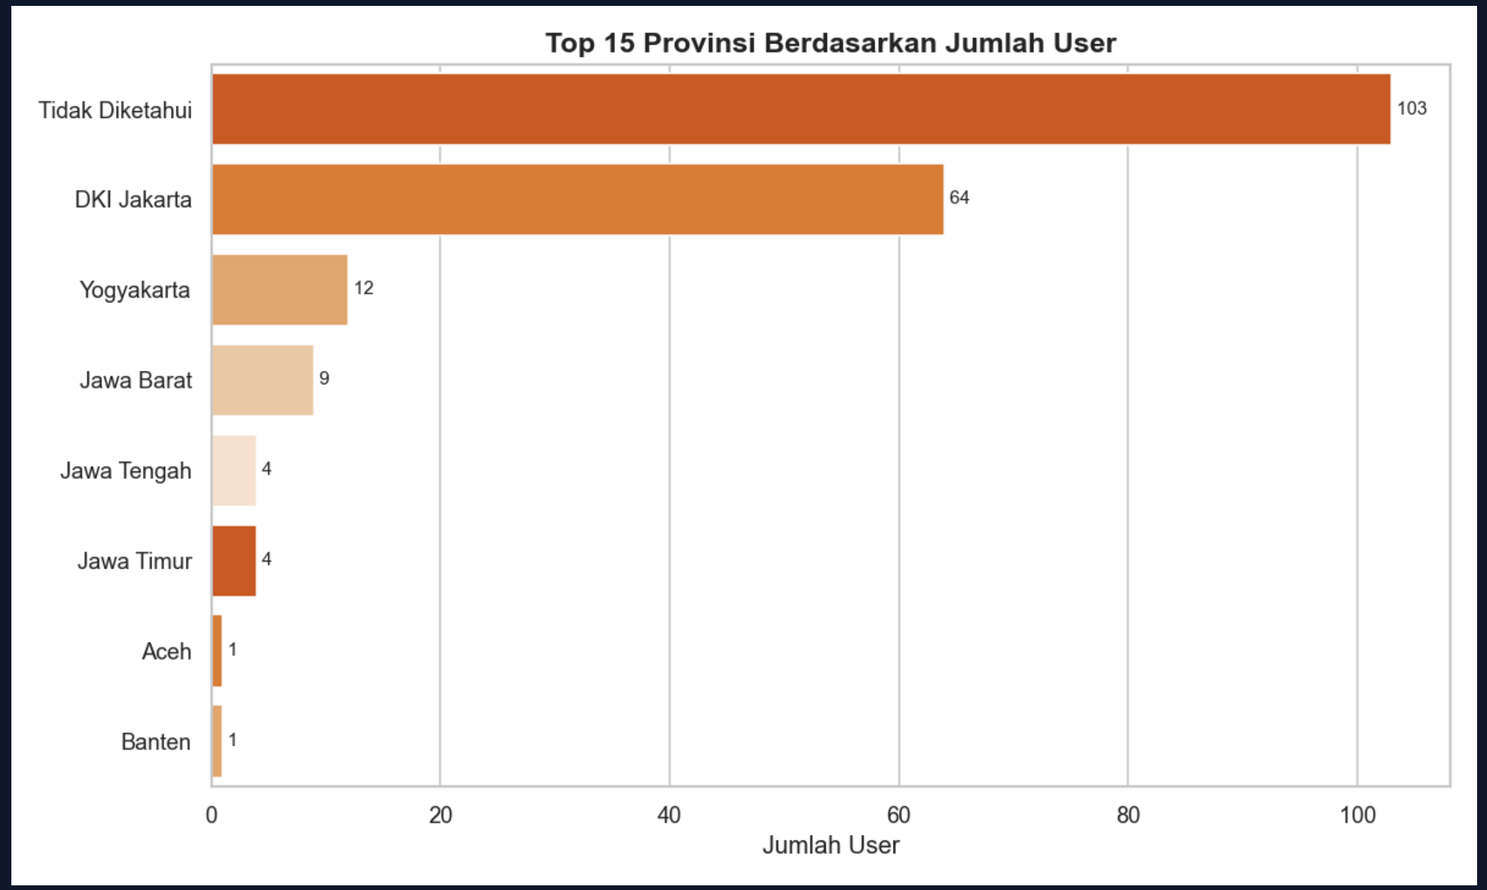
Monthly new user growth by user type



Key Findings

- Massive spike in Feb 2020 (177 users) → +1509% vs Jan
- Very low growth in 2014–2019 (~1 user per period)
- Shift to PERSONAL users → all users in 2020, while ORGANIZATION only pre-2020
- Spike likely driven by campaign or external event

USER DISTRIBUTION BASED ON PROVINCE



Key Findings

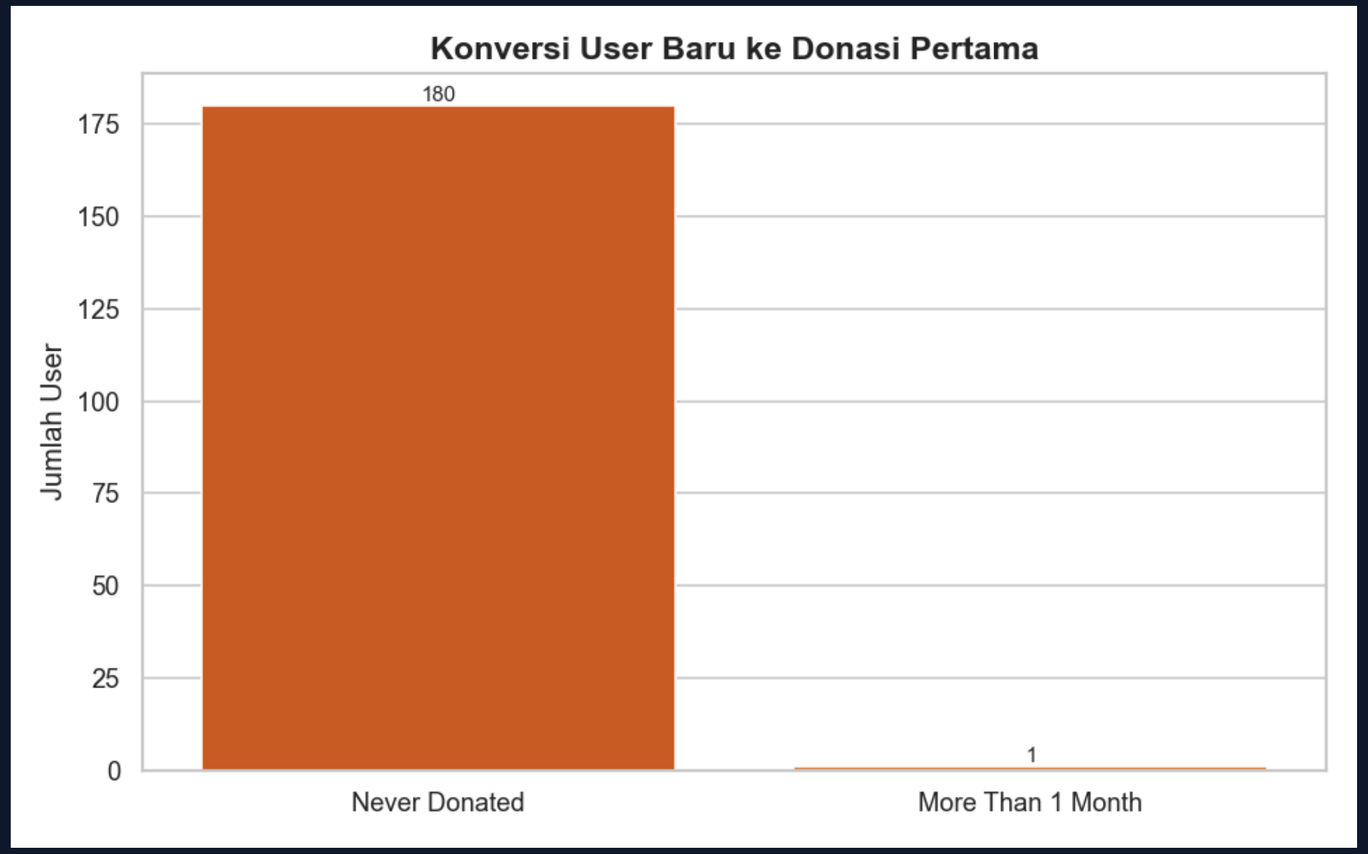
52% users have unknown province → major data quality issue

DKI Jakarta dominates (~67% of identified users)

Users heavily concentrated in Java (~99% of identified)

Significant untapped potential outside Java

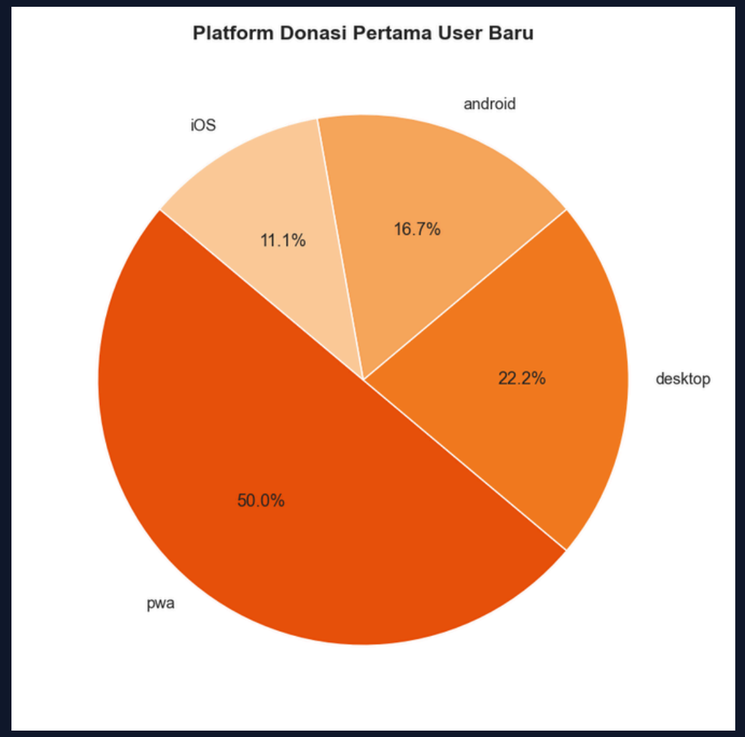
CONVERT NEW USERS TO FIRST DONATIONS

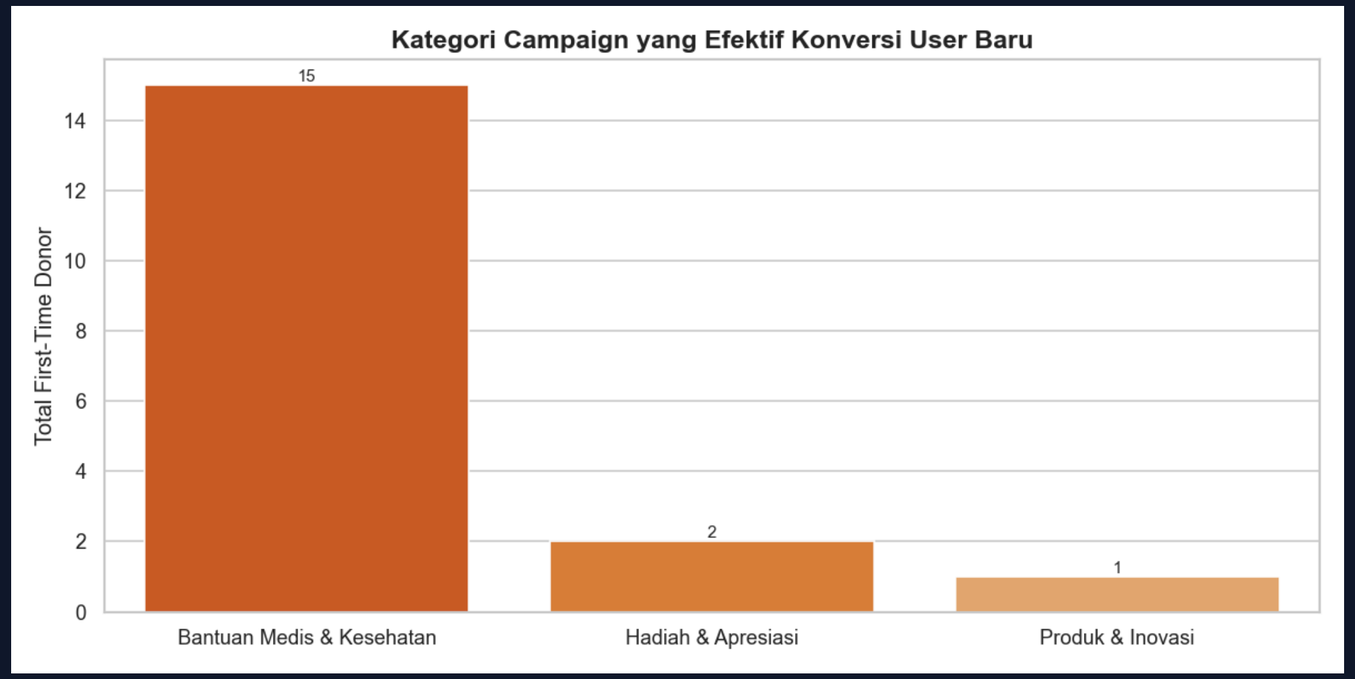


Key Findings

- Low observed conversion (99.45% users have not donated yet)
- Likely driven by limited observation window (most users joined in Feb 2020)
- Only 1 user converted (>1 month after registration)
- Indicates a gap between signup and first donation

FIRST DONATION PLATFORM & CAMPAIGN CATEGORY





Key Findings

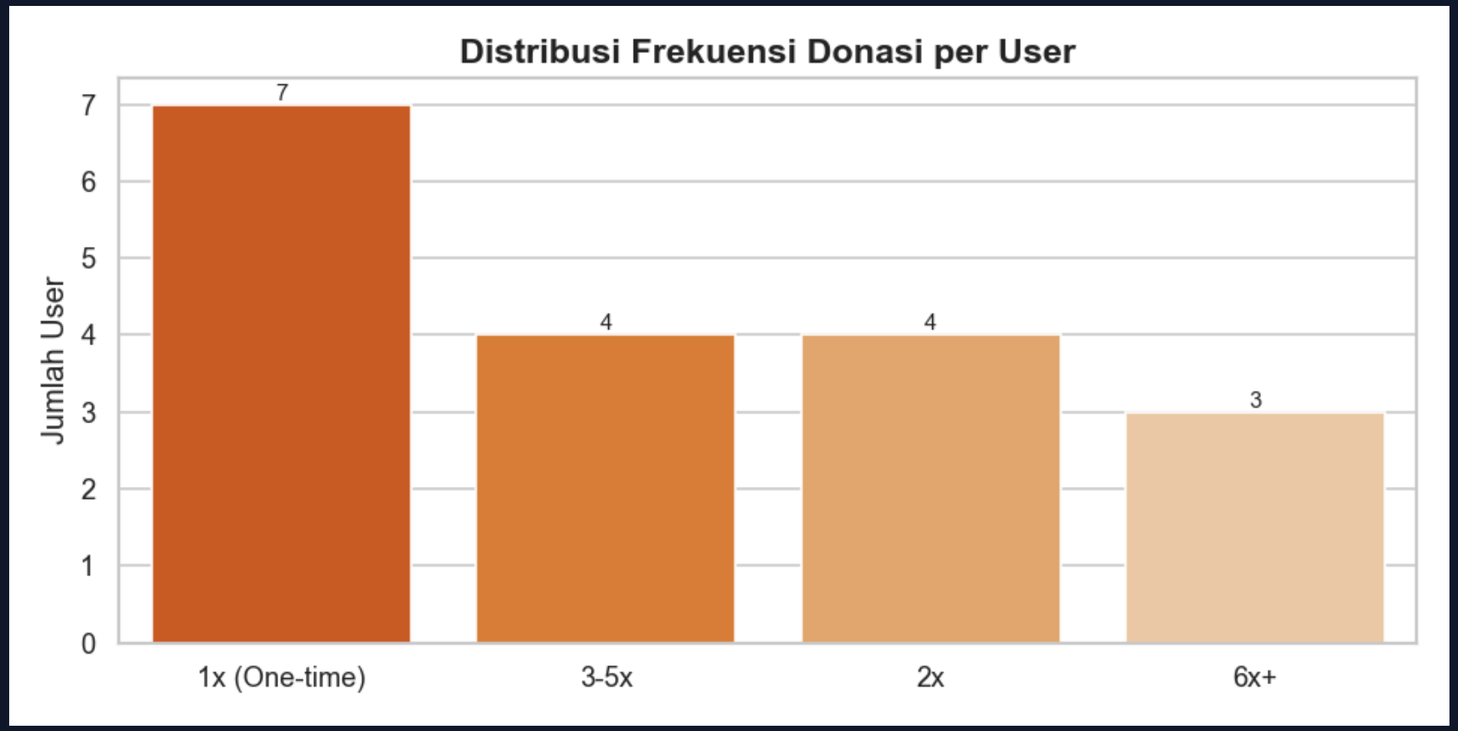
PWA appears dominant (50%) → web-based donation preferred

Web (PWA + Desktop) = 72% → lower friction vs mobile apps

Health campaigns dominate first-time donation (83%)

Indicates emotional trigger & urgency drive initial conversion

DONOR RETENTION AND LOYALTY



Key Findings

- One-time donors dominate (38.9%) → retention opportunity
- 3–5x donors are most valuable (highest avg donation)
- 6x+ donors are highly loyal but low-value
- Indicates different donor segments (loyal vs high-value)

SUMMARY OF MAIN FINDINGS

User spike in Feb 2020 (177 users), but conversion not yet fully observed

Users highly concentrated in Java (~99% of identified users)

PWA dominates first-time donation (50%) → web-based preferred

Health campaigns dominate initial conversion (83%)

One-time donors dominate → retention opportunity remains

Recommendation 1: User Acquisition Strategy

Expand Beyond Java

- Focus on Sumatera & Sulawesi (untapped potential)
- Partner with local communities & institutions
- Leverage regional campaigns & local issues

Optimize PWA as Main Acquisition Channel

- Prioritize web experience (72% usage)
- Improve loading speed & simple donation flow
- Leverage SEO & Google Ads to campaign pages

Improve Data Quality for Targeting

- Fix missing province data (52%)
- Enable better geo-based campaign targeting

Recommendation 2: User Activation & Retention

72-Hour Onboarding Program

- Day 1: Show trending health campaigns
- Day 2: Push notification (urgency-based)
- Day 3: Social proof messaging

First Donation Trigger

- Create low-barrier starter campaigns (Rp 10K–50K)

Leverage Health Campaign as Entry Point

- 83% first donation from health category
- Feature health campaigns for new users

Retention Program

- “Second donation nudge” after 7 days
- Loyalty program for 3–5x donors
- Subscription model for 6x+ donors

Recommendation 3: Campaign & Ads Optimization

Improve Ads Effectiveness

- Test paid vs organic performance
- Measure incremental impact of ads

Complaint-Based Campaign Monitoring

- 74% campaigners submitted complaints
- Prioritize high-priority tickets (SLA system)

Diversify Campaign Categories

- Reduce dependency on health campaigns
- Develop education & social campaigns

Conclusion & Key Takeaways

Summary

Kitabisa shows strong user growth potential, but faces key challenges in conversion and retention

Top Priorities

- User Activation → onboarding + health campaign as entry point
- Geographic Expansion → beyond Java + improve data quality
- Donor Retention → second donation nudge + loyalty program

Deliverables

- BigQuery analysis (ads, campaign, user behavior)
- Looker Studio dashboard (company health monitoring)
- Python visualization (descriptive insights)
